

# ALLY™ Plus

## A Whole Home Wi-Fi System that Protects

Secured by  **AVG**

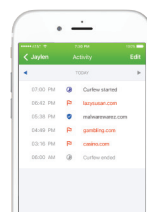

### Internet-Free Moments

Set individual Wi-Fi schedules for each child or pause the Internet during homework or dinner time.

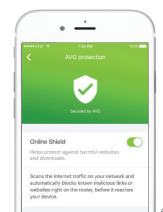

### Your Custom Internet

Manage online activities by blocking access to web content, online console gaming, or apps.

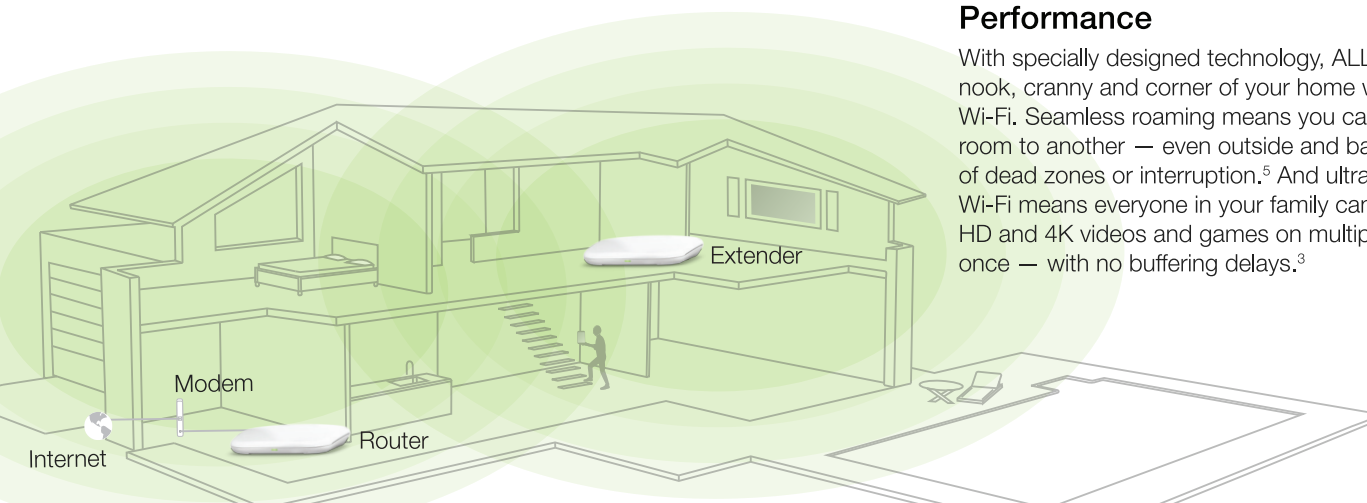

### Activity Reports

See a report of your kids' online activity so you can keep a tab on what they are up to.

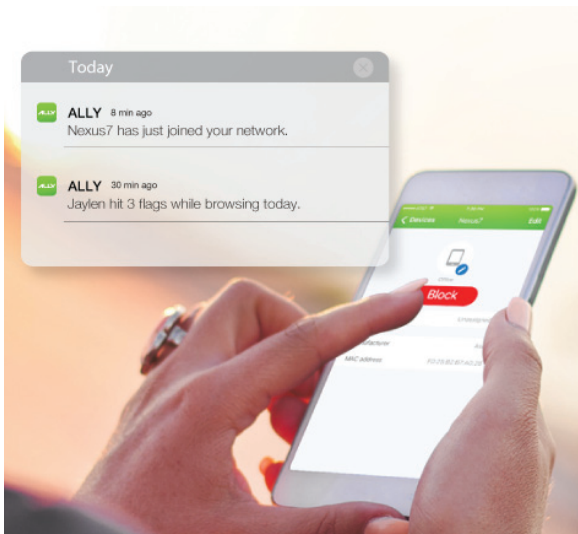

### Secured by AVG®

Protect the devices on your network from malware and phishing attacks by blocking harmful websites.

## Performance

With specially designed technology, ALLY blankets every nook, cranny and corner of your home with powerful Wi-Fi. Seamless roaming means you can move from one room to another — even outside and back — with no fear of dead zones or interruption.<sup>5</sup> And ultra-fast, AC1900 Wi-Fi means everyone in your family can actually stream HD and 4K videos and games on multiple devices at once — with no buffering delays.<sup>3</sup>

### On-The-Go Security

Get activity alerts when flagged sites are visited and block unknown devices that try to connect to your network. Security at home, no matter where you are.

### Simple App Setup

Set up your new ALLY Wi-Fi network in minutes, with easy to follow steps within the app.

## Options

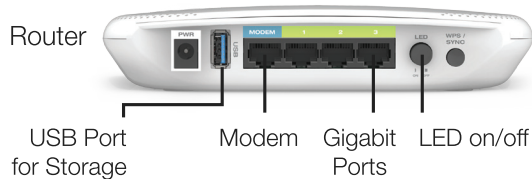

**ALLY**  
Small - Medium Homes  
Router

**ALLY Plus**  
Medium - Large Homes  
Router & Extender

## Ports

Specifications are subject to change without notice.

<sup>1</sup> Range specifications are based on performance test results. Actual performance may vary due to differences in operating environments, building materials and wireless obstructions. Performance may increase or decrease over the stated specification. Wireless coverage claims are used only as a reference and are not guaranteed as each wireless network is uniquely different. Maximum wireless signal rate derived from IEEE 802.11 standard specifications. Actual data throughput may vary as a result of network conditions and environmental factors. May not work with non-standard Wi-Fi devices such as those with proprietary software or drivers. Supports all Wi-Fi standards that are compatible or backwards compatible with 802.11a/b/g/n/ac Wi-Fi standards.

<sup>2</sup> For MU-MIMO to work, additional MU-MIMO capable devices must be connected to the network.

<sup>3</sup> All transmission rates listed, for example 600Mbps for 2.4GHz and 1300Mbps for 5GHz, are the physical data rates. Actual data throughput will be lower and may depend on external factors as well as the combination of devices connected to the router. AC1900 wireless speeds are achieved when connecting to other AC1900 capable devices.

<sup>4</sup> The ALLY app and its features may change without notice. The ALLY app is provided by AVG and subject to the terms available at <http://www.chimewifi.com/tos>.

<sup>5</sup> Connecting devices must support seamless roaming Wi-Fi technologies for uninterrupted seamless roaming between ALLY devices. A single network identification name (SSID) is used for each individual Wi-Fi frequency: 2.4GHz and 5GHz.
